Hurricane María

On September 20, 2017, life changed for millions of people living in Puerto Rico (PR). That’s when Hurricane María, packing winds in excess of 155 miles per hour, slammed into the island. The Category 4 storm left millions homeless, destroyed the island’s power grid, and killed thousands. Presbyterian Disaster Assistance (PDA) has been walking alongside leaders on the island since before the hurricane. This article provides information about PDA’s response in PR since Hurricane María.

“We saw that PDA is not just a name. We came here and we can see that the work is real.”
